*Plant your roots in Christ and let Him be the foundation
for your Life. Colossians 2:7*

January 2020

December 2019

Such a wonderful and very busy month! From decorating the tree, caroling at area nursing homes and feasting at our Thanks for Christ dinner, to making crafts and cookies for seniors and shut-ins, the true spirit of Christmas was alive and well at New life. We collected a whole box of socks and mittens that we donated to Human Services. Our annual Pie Guy contest was won by Joe Melcher. Good job Joe. Thanks to everyone who contributed their time, talent and treasure to demonstrate the love of Jesus.

Our kids did a great program
on the gifts of Christmas
Love, Joy, Peace, Hope and Faith

Christmas Eve Candlelight Service

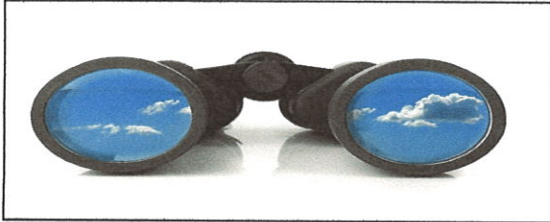

Light dispels the darkness. God sent his son, a brilliant light, into this dark world. That light has spread all over the earth. The message of God's great love and mercy has set prisoners of sin free. The work is not over. As we lit our Christmas candle, we were reminded that we are to be God's light everywhere we go.

SHINE YOUR LIGHT

Supported Missions update

FAME

Partnerships to Reach the Least of These

By Megan Schreiber

As a supplier of quality medical supplies and equipment and an active player in expanding God's kingdom through medical evangelism, FAME has become a reliable partner for Haitian Christian Outreach! Over several years, Haitian Christian Outreach (HCO) and FAME have built a collaborative relationship based on a common goal of providing necessary resources to the least of these. The mission of HCO is to do something in Haiti that will last. Through our four points of ministry which includes church planting, education, health care and community development, HCO is evangelizing, equipping, empowering and encouraging Southeast Haiti.

On the Peredo campus in Southeast Haiti, Haitian Christian Outreach opened a two Operating Room suite surgery center in April 2019 as part of the second phase of their Peredo Community Hospital construction. The first phase included the main hospital building, pharmacy and laboratory. The third phase will be a twenty-two-bed long term stay facility on the top floor of the surgery center. To open the surgery center, we needed large, specific pieces of equipment to perform cases safely and effectively.
